

Trident Technical College (TTC) is conducting market research to gather information from vendors who provide a sustainable, comprehensive higher education data analytics and warehousing solution that will integrate disparate data sources, enabling employees across campus to engage in data-driven decision-making, strategic planning, and student success tracking. TTC is not searching for a consultant solution, or a solution that provides only data analytics or only data warehousing. The college needs a vendor to provide both data analytics and data warehousing capabilities.

TTC is a public, two-year, multicampus community college that provides quality education and promotes economic development in Berkeley, Charleston and Dorchester counties. TTC is one of the largest institutions in the state, enrolling over 20,000 students in credit programs annually, and additional students in non-credit courses. These students have a wide variety of educational goals, including university transfer. TTC further promotes economic development through customized education and training for business, industry and government and a variety of employment training programs. Learn more at [www.tridenttech.edu](http://www.tridenttech.edu).

If you wish to provide information regarding a data analytics and warehousing solution as a part of this market research, please contact:

Carol A. Belcher, C.P.M., Director of Procurement,  
Trident Technical College
