MLT 135 Clinical Chemistry and Instrumentation

Lec: 2.0 Lab: 3.0 Credit: 3.0

This course is a study of the chemical elements in human specimens and their relationship to organ system function. It provides theory and application of laboratory instrumentation used in measuring chemical elements in human specimens, calibration, QC, interferences and clinical correlation

Prerequisite

MLT 101

Course Offered

Summer

Grade Type

Letter Grade

Division

Health Sciences
