## Computer Technology - Computer Programming

Associate in Applied Science in Computer Technology

Computer Programming Career Path

**60 Credit Hours**

The Computer Programming degree track provides technical competencies required to be productive in an entry-level programming position. This degree track provides skills in a variety of modern programming languages such as JavaScript, Java, JQuery, PHP, CSS, HTML and SQL. Graduates will be equipped with programming skills to find employment as business-application programmers, database managers and system analysts. They also will plan, design and develop programming applications, as well as create and host web applications. These valuable skills enable graduates to work in IT for small businesses, public and private corporations, and in private practices.

Students can earn only one Computer Technology degree in a single career path.
