Early Care and Education - School-Age and Youth Development

Early Care and Education

School-Age and Youth Development Career Path

Associate in Applied Science

Credit Requirements: 66 semester credit hours

The Early Care and Education program provides a solid foundation for graduates so that they may use developmentally appropriate, research-based and current knowledge in early care and education to build intentional teaching skills. Students gain quality intentional early learning experiences as well as understanding the responsibility of the professional in the field of early care and education. Students also construct a professional pedagogy that they will be able to use in the classroom with young children. In the process of developing their own pedagogy, students will create a disposition of collaboration that recognizes the diversity of families and the larger community. Off-campus observation and field experiences are provided in diverse settings that allow for quality practical and hands-on experiences. Upon successful completion of the program, each student will have the tools that will make them intentional teachers and caregivers.

The School-Age and Youth Development career path prepares students to work with school-age youth ages five to 17 years, in before- and/or after-school settings as well as faith-based youth development programs and summer camps. This career path does not lead to teacher certification for public school teachers.

Students can earn only one ECD degree in a single career path.

Admission Requirements

Admission into this program requires proof of high school graduation (or GED) and qualifying scores on SAT, ACT or the TTC placement test.

The Early Care and Education associate degree also requires the following additional requirements as prerequisites to labs in licensed child care centers and/or public schools: a health assessment denoting good health, a negative tuberculosis skin test, compliance with technical standards and a clear criminal background check by the South Carolina Law Enforcement Division (SLED). In addition to SLED background checks, some child development centers and schools may require fingerprinting. Students entering these laboratory and off-campus observation courses may opt to be fingerprinted. Fingerprinting and a SLED background check are required for the Early Care and Education workforce.
