2022-2023 TTC Catalog

IST 292 Fundamentals of Network Security II

Lec: 3.0 Lab: 0 Credit: 3.0

This course is a study of advanced security processes based on a security policy, emphasizing hands-on skills in the area of secure perimeter, security connectivity, security management, identity services and intrusion detection. The course prepares students to install/configure secure firewalls. This course leverages skills and knowledge in the Network and Cybersecurity curriculum to build, document and demonstrate a secure information technology infrastructure
